AOL. Value

Here's what it is . . .

E-mail Anti-Virus: Detects known viruses in e-mail attachments and repairs them automatically or notifies you.

Parental Controls: Help protect your kids online—determine the Screen Names they communicate with and Web sites they can access. Kids can even request specific sites and you decide whether to allow access.

Improved E-mail (dial-up): AOL provides superior e-mail management tools that let you sort, filter, and organize giving you more control than ever. Now you can store important e-mails indefinitely and access them from any Internet connection.

Superbuddy™ Icons and Web Messaging: Superbuddy icons and Web Messaging let you capture and share your favorite moments online. Superbuddy icons capture web pages and Web Messaging lets you send messages to friends.

Web Pop-up Controls: Help you surf the Internet. And . . .

9.0 OPTIMIZED

Here's what to say . . .

AOL's e-mail Anti-Virus protection in 9.0 Optimized is great for you because it automatically scans for viruses, and it notifies you when there's a virus so you can keep your computer running well.

AOL's Parental Controls give parents greater confidence that their kids are not visiting Web sites that they shouldn't be with the new Web Lockdown feature. This is great for you because it's the most advanced way to protect your kids from seeing things you don't want them to see, and it's only on AOL. And now you can preview any mail that has been caught by AOL's spam filters before it reaches your child's mailbox. Other features include the Online Times, AOL Guardian, the ability to adjust children's access from AOL.com, and the AOL. Cast Card.

AOL's improved e-mail is great for you because it's easier than ever to manage, locate, and store e-mails so neither what Internet connections you use using 9.0 Optimized, your filing cabinet is integrated into your mailbox, and AOL gives you 20MB of free permanent online storage for important e-mails.

AOL for Broadband

Here's what it is . . .

Enhanced Value: Access to features and programming you'd have to pay more than \$100 per month for elsewhere on the Web.

Firewall: Helps to lock out intruders before they can access your computer and personal information. (Firewall protection requires a separate download; see AOL KW: Firewall Express.)

AOL Communicator: Advanced e-mail and IM

Here's what to say . . .

You can enhance your high-speed connection with AOL for Broadband! With AOL for Broadband, you get access to more than \$100 per month of exciting features and programming at no additional charge to you—things like CNN News Pass, online e-mail storage, and firewall protection. This is great for you because it means more value for your money: it's sort of like adding extra features to your car and not paying extra for them!

Get added protection for you and your family with AOL for Broadband 9.0 Optimized Firewall Protection. A firewall is crucial with an "open" high-speed connection because it helps keep hackers from breaking into your computer and stealing your personal information. This is great for you because AOL for Broadband helps lock hackers out so you have fewer worries!

AOL Communicator gives you a flexible, advanced e-mail and IM option. It continues

Connectivity

Here's what it is . . .

Top Speed™ Technology: Built-in Web acceleration technology that is designed to enhance your Web surfing experience.

AOL Computer Check-up: Examines your computer for the most common problems, tells you what's wrong and shows you how to fix it—or fixes it for you.

Auto Reconnect: Automatically reconnects you right where you were in case you get disconnected.

9.0 OPTIMIZED

Here's what to say . . .

AOL's Top Speed™ Technology can help get you to your favorite Web sites faster. This is great for you because Top Speed™ Web acceleration technology is designed to enhance your Web surfing experience—saving you time and helping you get the content and information you want.

AOL's Computer Check-up is great for you because it helps improve your computer's reliability and functionality by being your advice and fix it tool. It can also help your computer run as fast as possible and helps fix problems before they impact your computer's performance.

Auto Reconnect is terrific for you because it reduces your online disconnect frustration; it automatically brings you back online if you get disconnected. Plus, 9.0 Optimized has more reliable connectivity with lower disconnect rates.

AOL for Broadband (continued)

Here's what it is . . .

Radio@AOL: Choose your favorites from more than 175 stations in CD-quality sound.

Enhanced Instant Messaging: IM keeps getting better and better! Improvements to the overall AOL IM experience include improved Away Message handling, Buddy radio indicators, and the new grouped format for easy navigating through multiple conversations.

AOL (Multiple Simultaneous Log-ins): Everyone

Here's what to say . . .

You can have more fun when you're online with Radio@AOL because you can listen to more than 175 stations and have CD-quality sound right from your computer—you won't believe the quality! And now it's even better with improved reliability and faster load times. This is great for you because you have an awesome selection of channels and it sounds just like you're listening to your CD player.

AOL's Enhanced Instant Messaging is great for you because you can easily share files and pictures with AOL or AIM buddies without having to download files. With a USB phone or microphone and speakers, you can even have one-on-one voice conversations, enabling you to talk to friends and family while you are online.

With AOL for Broadband, there's no more waiting in line to get on the Internet because everyone can be online at the same time only one

AOL 9.0 Optimized LE

Here's what it is . . .

AOL 9.0 Optimized LE automatically configures itself to give you the best AOL experience possible for your computer's specific memory.

- Disables:**
- Superbuddy™ Icons
 - Desktop Themes
 - Advanced themes for the AOL™ and KID™ experiences
 - Flash™ IM Wallpapers
 - Video Messenger
 - All QuickViews
 - Port Mgmt

Also:

- Does not run Quicktime
- Does not auto-launch AOL Companion
- Delivers lower impact dial-up Welcome Screen (even for users connecting via high-speed connection)
- Delivers lower-impact content experiences
- Disables and does not launch AOL Spyware Protection

Here's what to say . . .

AOL 9.0 Optimized Low-RAM version is great for you because it automatically detects the amount of available memory you have on your computer and gives you the best AOL experience possible for your computer.

Explain to the members that there is a Low-RAM edition available, but do not use the name "LE" when explaining the client to our members.

When low RAM is identifiable with members, say "We now have a version made specifically for you!"

Low-RAM LE provides the ability for new or existing AOL members to install 9.0 Optimized on machines that have less than the minimum RAM requirements (109MB) while still providing significant features to our members.

How does it work?

- Automatically detects the amount of RAM available on the computer and installs 9.0 Optimized with specific features not installed or turned off upon installation.
- Enables AOL members to use the significant features of 9.0 Optimized that were previously unavailable to them.

GLOBAL GAS FLARING REDUCTION PARTNERSHIP: TOWARDS A WORLD FREE OF FLARES

Although the burning of natural gas, or flaring, is the safe and effective method of disposing of excess natural gas associated with oil production, flaring also wastes a valuable clean energy resource and emits carbon dioxide, a greenhouse gas.

The World Bank estimates that over 150 billion cubic meters (or 5.3 trillion cubic feet) of natural gas are being flared and vented annually. That is equivalent to 25 per cent of the United States' gas consumption or 30 per cent of the European Union's gas consumption. And the annual 40 bcm (or 1.4 trillion cubic feet) of gas flared in Africa alone is equivalent to half of that continent's power consumption.

Flaring gas also has a global impact on climate change by adding about 350 million tons of CO₂ in annual emissions. This is more than the potential yearly emission reductions from projects currently submitted under the Kyoto mechanisms.

But countries and companies often face barriers to reduce gas flaring, including: limited access to international gas markets as well as weak local markets to commercialize the gas; lack of funding to put in place the necessary infrastructure to use the associated gas; and an undeveloped regulatory framework for using that gas.

Thus, reducing gas flaring requires a global and concerted effort by governments and industry, as well as financial institutions, energy utilities and local communities.

OVERCOMES BARRIERS TO REDUCING FLARING

Launched at the World Summit on Sustainable Development, the Global Gas Flaring Reduction public-private partnership brings together representatives of governments of oil-producing countries and major international oil companies to address the barriers to reducing gas flaring by sharing country-specific programs.

The GGFR partnership, a World Bank-led initiative, promotes efforts to use currently flared gas by promoting access to local and international energy markets.

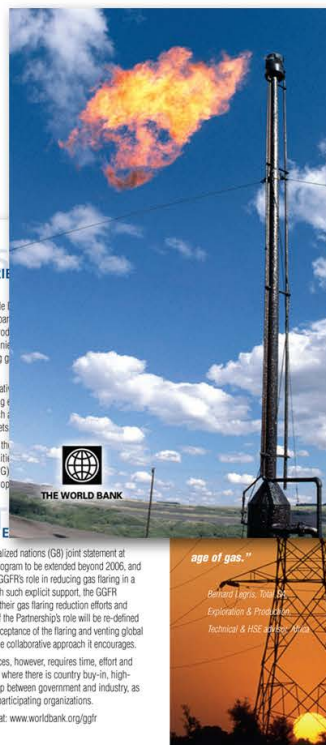

Poverty reduction is also an integral part of the developing concepts for how local communities can benefit from natural gas and liquefied petroleum gas (LPG) instead of being wasted. The program has already evaluated opportunities for utilization in several countries.

GGFR'S COLLABORATIVE EFFORTS

In July 2005, the Group of eight most industrialized nations (G8) joint statement at Gleneagles, Scotland, called for GGFR work program to be extended beyond 2006, and in July 2006 the G8 reaffirmed its support for GGFR's role in reducing gas flaring in a statement issued in St. Petersburg, Russia. With such explicit support, the GGFR partners have now agreed to continue on with their gas flaring reduction efforts and programs until end of 2009, when the future of the Partnerships role will be re-defined by all stakeholders involved. There is broad acceptance of the flaring and venting global Standard introduced by the partnership, and the collaborative approach it encourages.

Effecting change in flaring and venting practices, however, requires time, effort and persistence. GGFR has been most successful where there is country buy-in, high-level support and an effective local partnership between government and industry, as well as ownership and leadership within the participating organizations.

To learn more about GGFR, visit our website at: www.worldbank.org/ggfr

Global Gas Flaring Reduction Partnership: TOWARDS A WORLD FREE OF FLARES

THE WORLD BANK

GGFR
Global Gas Flaring Reduction
A Public-Private Partnership

"...age of gas."

*Richard Legros, Team Lead
Exploration & Production
Technical & HSE Affairs Africa*

"Reducing gas flaring is a major undertaking in the Nigerian oil and gas industry that requires significant effort and investment for gas gathering and market development. The GGFR Partnership has helped to build the coalition required to achieve results on the ground."

GGFR DELIVERS RESULTS

- Ten major oil companies, the OPEC Secretariat and 14 countries that contribute a significant share of the world's total flaring (about 70 percent) have already joined GGFR.
- The majority of partners have endorsed a Global Standard for gas flaring reduction.
- GGFR is implementing demonstration projects for associated gas utilization in eight countries.
- GGFR is assisting Algeria, Cameroon, Equatorial Guinea, Kazakhstan, Nigeria, and Qatar to meet identified dates for zero flaring, through increased collaboration between operators, the national oil company and the regulator.
- Potential avoided flared gas, through GGFR facilitated carbon projects, is approximately 12 billion cubic meters per year (or 423 billion cubic feet), equivalent to 115 million tons of CO₂ emissions reduction by 2012.
- GGFR has developed a unique web-based tool to report flared and vented data by country. The data tool will be implemented in GGFR partner countries, starting with Cameroon, Nigeria, Algeria and Qatar.

Helping Nigeria meet its flaring reduction objectives

Nigeria is the leading gas flaring country in the world, with around 24 billion cubic meters of gas flared in 2004 (847 billion cubic feet), or 45 percent of its total gas production. As a GGFR partner since the start of the initiative, Nigeria has set the ambitious target of eliminating gas flaring in the next few years.

DID YOU KNOW THAT...

- Fewer than 20 countries account for more than 85 percent of gas flaring and venting.
- Just four countries—Iraq, Iran, Nigeria and Russia—together flared about 60 billion cubic meters of associated gas in 2004.
- In 2004, the 150 billion cubic meters (or 5.3 trillion cubic feet) of natural gas flared were equivalent to 30 per cent of the European Union's gas consumption, 25 per cent of the U.S. gas consumption, or 75 per cent of Russia's gas exports.
- Every year oil producers flare and vent gas equivalent to more than the combined gas consumption of Central and South America.
- The gas flared annually in Africa could produce 200 terawatt-hours of electricity, about more than twice the current power consumption of Sub-Saharan Africa (excluding South Africa).
- For the past 20 years, overall global flaring levels have remained virtually constant, despite many individual governments and companies successes in reducing flaring. These efforts have been limited not only because of the increase in global oil production and the associated gas production, but also because of the major constraints that hinder the development of gas projects.

GGFR AT A GLANCE

- The GGFR partnership was launched at the World Summit on Sustainable Development in Johannesburg in 2002.
- GGFR aims to support efforts to use the associated gas and to reduce flaring and venting by bringing together the public and private sectors.
- GGFR focuses on four key areas: commercialization of associated gas; regulations for associated gas; a voluntary standard for associated gas flaring and venting reduction; and carbon credits.
- A small team of World Bank staff and industry seconded based in Washington, DC, coordinates and implements the GGFR work program.

Instrumental in markets, to develop overcome upstream

President on Energy, Nigeria

WHAT IS GAS FLARING?

When crude oil is brought to the surface, gas associated with the oil comes to the surface as well. The gas may be used at the installation as fuel for generators, may be transported via pipelines and sold elsewhere, or may be injected into the ground. But in areas of the world lacking gas infrastructure and markets, this associated gas is usually released into the atmosphere, ignited (flared or burned) or un-ignited (vented).

Flaring and venting is also an important safety measure at oil production facilities, safely disposing of gas during emergencies, power and equipment failures, or other upsets in oil production that might otherwise pose hazards to workers on nearby residents. But in many oil-producing countries the practice goes far beyond normal operational and safety levels.

AREAS OF ACTION

The GGFR action plan for reducing gas flaring and venting focuses on four key areas:

Commercialization of associated gas

To reduce gas flaring, the GGFR provides assistance in developing domestic markets for associated gas, and in gaining access to international markets. The GGFR team facilitates demonstration projects for associated gas utilization by establishing partnerships between the relevant stakeholders. It also provides advice to governments (on fiscal legislation), to oil companies (on best practices and carbon credits trading), and to potential gas customers (on market development and gas agreements).

Regulations for associated gas

International experience shows that effective enforcement of regulations and the provision of the right incentives are crucial to reducing flaring. A recent study on the role of regulation in gas flaring and venting in 44 oil-producing countries found, however, that most developing countries lack efficient, effective regulations on flaring and venting. In many of these countries institutions have inadequate capabilities and overlapping responsibilities. The GGFR Partnership's work on regulations also has focused on enabling the use of associated gas by helping governments create the right incentives such as proper regulatory structures governing pricing, distribution, shared transport, export facilities, etc.

Other important regulatory procedures also include those for approving flaring and venting permits, monitoring flaring and venting volumes, and enforcing operational standards.

Implementation of the global flaring and venting reduction Standard

The majority of GGFR partners have now agreed to endorse a voluntary Standard to eliminate venting and reduce flaring significantly within five to ten years, by finding commercial uses for the associated gas through increased collaboration between countries. The Standard also implies that countries and companies that have endorsed it will avoid flaring in new oil developments, if economically feasible.

The voluntary Standard, which was developed by operators and governments, also encourages an integrated approach to the utilization of associated gas and provides a framework for governments, companies, and other key stakeholders to consult with one another, take complementary actions, and publish figures about flaring and venting volumes in a unique web-based data tool developed for GGFR partners.

Capacity building to obtain carbon credits for flaring/venting reduction projects.

In 2002, the GGFR released a report on Kyoto Mechanisms for Flaring Reductions which attempts to overcome financial constraints on projects to reduce gas flaring by designing innovative financing mechanisms, including carbon credit trading.

GGFR has facilitated flare reduction demonstration projects in Angola, Algeria, Indonesia, Nigeria, and Russia to evaluate their potential to earn greenhouse gas credits through the CDM/JI structure, and to show how carbon credit trading can improve the economic viability of gas flaring reduction projects.

Gas Consumption vs Global Flaring 2005

"The global flaring challenge requires the strength of collaboration, through a Partnership like GGFR, combined with an effective regulatory framework to achieve the goal of reducing flares."

Arden Berg, Board member, Alberta Energy & Utilities Board, Canada

EXTRACTIVE INDUSTRIES TRANSPARENCY INITIATIVE

Better Accounting Better Accountability

oil, gas, and mining revenues contribute to sustainable development and poverty reduction.

Which countries are implementing EITI?

EITI is now a global initiative. Some twenty countries have either endorsed, or are now actively implementing EITI—in South America, Africa, Europe, and Asia. For the most recent list of countries and information on what they are doing, please look at the EITI Countries section of the EITI website.

How does it work?

The EITI Secretariat has developed an EITI Source Book that provides guidance for countries and companies wishing to implement the Initiative. The Source Book can be found on the website (in several languages) or hard copies can be obtained from the Secretariat. The process shown in the following diagram, combined with the EITI Principles and Criteria, shows an EITI process would work:

EITI Process

Sign up

- Issue government announcement
- Commit to work with all stakeholders
- Appoint implementation leader
- Compose and publish workplan

Preparation

- Establish multi-stakeholder committee
- Engage industry and civil society
- Remove obstacles to implementation
- Agree reporting templates
- Select and approve neutral EITI administrator
- Ensure full industry participation
- Ensure company and government accounts are properly audited

Disclosure

- Disclose payments and revenues to administrator
- Receive report from administrator
- Identify and explain discrepancies
- Recommend improvements

Dissemination

- Disseminate EITI report
- Review lessons learned and repeat

The EITI Criteria

The EITI Criteria were developed by the EITI London Group in March 2005 and are the criteria that countries need to successfully implement EITI. They are:

1. Regular publication of material oil, gas, and mining payments to government and all material revenues received by oil, gas, and mining companies ("revenues") in a publicly accessible and comprehensible manner.
2. Where such audits do not already exist, payments and revenues are the subject of a credible, independent audit, applying international auditing standards.
3. Payments and revenues are reconciled by a credible, independent administrator.

work plan for all the above is developed by the host government, with assistance from the international financial institutions where required,

EITI is a chance to demonstrate that private enterprise can invest, and jobs can be created, and poverty can be broken out of the cycle.

— Hilary Benn, Secretary of State for International Trade

www.eitransparency.org

...transparency and accountability is very much at the heart of the development process.

— Paul Wolfowitz, President, World Bank Group

www.eitransparency.org

What is EITI?

The Extractive Industries Transparency Initiative (EITI) supports improved governance in resource-rich countries through the verification and full publication of company payments and government revenues from oil, gas and mining. The Initiative works to build multi-stakeholder partnerships in developing countries in order to increase the accountability of governments and companies. Good governance is a precondition for converting the large revenues from extractive industries into economic growth and poverty reduction. When transparency and accountability are weak, the extractive industries may instead contribute to poverty, corruption, and conflict—the so-called "resource curse." The EITI is an important step in defeating this "curse."

What are the benefits of implementing EITI?

The primary beneficiaries of EITI are the governments and citizens of resource-rich countries. Knowing what companies pay and what governments receive, is a critical first step to holding decision-makers accountable for the use of those revenues. Resource-rich countries implementing EITI can benefit from an improved investment climate by providing a clear signal to investors and to international financial institutions that the government is committed to strengthening transparency and accountability over natural resource revenues. Companies and investors, by supporting EITI in countries where they operate, can help mitigate investment risk: corruption creates political instability, which in turn threatens investments which are often capital intensive and long term in nature. Civil society can benefit from an increased amount of information in the public domain about those revenues that governments manage on behalf of citizens. In summary, implementing EITI as part of a program of improved governance will help to ensure that

The Atlas of Global Development is a valuable resource for teachers and professors, students and scholars, and for people from all walks of life who want an accessible and yet comprehensive survey of our world today. It is also a valuable reference tool, which should be available in school, university, and public libraries alike.

The Atlas of Global Development vividly illustrates the key development challenges facing our world today. Presented in easy-to-read, colorful world maps, tables, graphs, text, and photographs, the atlas highlights social, economic, and environmental issues that affect us all. The atlas brings to life country comparisons of social indicators such as life expectancy, infant mortality, safe water, population below the poverty line, and energy efficiency, as well as basic economic indicators like income growth, income

per person, and private capital and aid flows. Issues that have been hitting the headlines such as HIV/AIDS, extreme poverty, corruption, international aid, and trade are presented, giving an unbiased view of the state of the world we live in.

The Atlas of Global Development builds on the World Bank Atlas which has been published by the World Bank for the last 35 editions. A CO-PUBLICATION WITH HARTER COLLINS

"AT-A-GLANCE" GUIDES TO THE MOST PRESSING GLOBAL DEVELOPMENT ISSUES

Specifically designed to show detailed information on a small scale, the **miniAtlas** series is a useful introduction and an easy-to-use quick reference for better understanding the most important development issues facing our world today.

miniAtlas of Millennium Development Goals: Building a Better World
The Millennium Development Goals—agreed by 189 countries in 2000—set clear targets for reducing poverty and other sources of human deprivation and for promoting sustainable development. But how far are we towards meeting these goals? And what resources are needed to help those countries that are not on track? This miniAtlas provides a wealth of information for over 200 countries and territories on today's key global issues, from eradicating poverty and reducing child mortality to eliminating HIV/AIDS and promoting environmental sustainability.

Green miniAtlas

"This second title in the World Bank's 'miniAtlas' series contains a wealth of environmental information. This is a worthwhile purchase."
—LIBRARY JOURNAL, October 1, 2004

The Green miniAtlas draws on data from the World Bank's Little Green Data Book. It provides a wealth of information on key environmental topics for over 200 countries and territories. Taking an in-depth look at such critical issues as agriculture, forestry, biodiversity, energy, emissions and pollution, water and sanitation, protected areas, the Green miniAtlas is a unique and timely resource for better understanding the world's most urgent environmental challenges.

NEW! Online Atlas of Millennium Development Goals

This online atlas contains a set of interactive world maps that highlight progress made towards achieving the Millennium Development Goals. Supported by text, graphs, and graphics, it is designed to make a wide range of data for over 200 economies easily accessible and visually exciting.

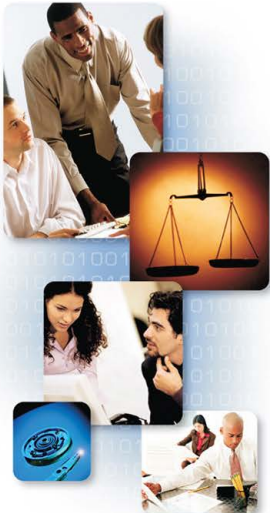

Computer Forensics Examination

Touchstone Forensics works with our clients to make balanced decisions on which data to capture, preserve and analyze. Throughout your case, we identify and prioritize key information sources to ensure that your resources are used wisely.

Every interaction with modern computer operating systems leaves trace information that can be recovered to reconstruct computer user activity, contents of documents and electronic communications. Many of these traces

ics's certified meticulous expertise enable possible, litigation costs

Touchstone Forensics, LLC

When the stakes are high, savvy law firms, businesses and government agencies look to Touchstone Forensics to gain powerful litigation and risk management advantages. They're working smarter, not harder!

Touchstone Forensics, LLC

A typical Forensic Insight examination consists of:

Evidence Acquisition

- Touchstone Forensics identifies and prioritizes the sources and locations of information that may be relevant to your case.
- Touchstone Forensics creates an acquisition plan that ensures all relevant case information is captured and minimizes the impact of this process to your normal business operations.
- Touchstone Forensics acquires and secures potential evidence properly to ensure the Chain of Custody is maintained for all evidence at all times.
- Touchstone Forensics allows you to maintain normal business operations throughout an investigation.

Forensic Analysis and Reporting

- Touchstone Forensics accesses information that may appear to be destroyed, deleted, encrypted or password protected, including e-mail, electronic documents, web browsing history, online chat logs, images, document creation, revision timelines and more.
- Forensic Insight analyzes acquired information using special purpose forensic analysis tools that identify pertinent findings, not mountains of unanalyzed data.
- Forensic Insight reviews evidence to determine information context and relevance and to identify leads for further investigation.
- Forensic Insight presents detailed and summary findings in a format that is usable by non-technical personnel, attorneys, judges and juries.

Typical Cases

- Computer break-ins and hacking attempts
- Intellectual property theft
- Divorce
- Sexual harassment
- Inappropriate Internet, E-mail usage
- Industrial espionage
- Breach of contract
- Wrongful termination
- Online stalking

AFRICA JOB SEARCH Strategies, Resources, and Business Culture for International Professionals

By Susan Musich

Globalization has greatly impacted the number of highly skilled professionals who seek employment in other countries. This book provides resources, commentary, and strategies to address the career transition faced by global professionals seeking employment in Sub-Saharan Africa. The book includes a CD-ROM containing detailed information about work permits, lists of employers, resources, and contact information for country-specific organizations.

CHALLENGES OF AFRICAN GROWTH Opportunities, Constraints, and Strategic Directions

by Benno Ndulu with L. Chakraborti, L. Lijane, V. Ramachandran, and J. Wolgin.

In the last ten years a number of countries in Sub-Saharan Africa have seen substantial improvements in their growth rates, and, consequently a reduction in poverty. However, that growth must be deepened and broadened if poverty is to be substantially reduced across the continent.

The purpose of this book is to support the efforts of economic analysts and practitioners in Sub-Saharan Africa who are working to design country-specific growth strategies by (i) presenting what recent research on the drivers of growth has discovered; (ii) providing support for economic diagnostic work focused on accelerating growth, and (iii) presenting a menu of options for addressing challenges: investment climate, infrastructure, innovation, and institutional capacity.

EDUCATION IN SIERRA LEONE Present Challenges, Future Opportunities

Recently emerging from a decade-long civil war, Sierra Leone has seen an unprecedented surge in school enrollments, and the future holds great promise as well as many challenges. The country must now negotiate a smooth transition from post-war recovery to regular service delivery which, this report argues, will depend on

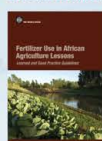

DOWN TO EARTH Agriculture and Poverty Reduction in Africa

by Luc Christiaensen and Lionel Demery

The impact of agricultural growth on poverty reduction in low income countries is far greater than any other sector. The organizing framework of *Down to Earth* centers on the distinction between the "growth" and the "participation" effects on poverty of raising sectoral productivity. The participation effect of agricultural growth on headcount poverty is estimated to be on average 2.5 times larger than that of the service sector—over 4 times larger in Sub-Saharan Africa. In addition, the lower direct growth effect of agriculture is usually compensated by its larger contribution to growth in other sectors, especially in the low-income countries. Policymakers concerned with reducing poverty must seek to restore the fortunes of this much-neglected sector.

FERTILIZER USE IN AFRICAN AGRICULTURE Lessons Learned and Good Practice Guidelines

The striking contrast between the limited use of fertilizer in Africa and the much more extensive use of fertilizer in other developing regions has stimulated considerable discussion about the role of fertilizer in the agricultural development process, as well as debate about what types of policies and programs are needed to realize the potential benefits of fertilizer in African agriculture. This report summarizes key lessons learned from past efforts to promote fertilizer in Africa, provides an overview of the current state of knowledge concerning technical aspects of fertilizer use in Africa, and presents good practice guidelines for promoting sustainable increases in fertilizer use.

ALSO AVAILABLE DISEASE AND MORTALITY IN SUB-SAHARAN AFRICA (2ND EDITION)

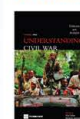

Edited by Edward R. Bos, Dean T. Jamison, Florence Baingana, Richard G. A. Feacham, Malegapuru Makgoba, Karen J. Hofman, and Khama D. Rogo.

Against the backdrop of the HIV/AIDS epidemic, conflicts and wars, famines and droughts, migration of human resources for health, as well as the global economic downturn, this second edition updates the current data and trends in morbidity and mortality for the Sub-Saharan region.

Hardcover, June 2006. 416 pages. Stock no. D16397 (ISBN 0-8213-6397-2). US\$60

UNDERSTANDING CIVIL WAR: EVIDENCE AND ANALYSIS Vol. 1: Africa

This groundbreaking work builds upon the World Bank's prior research on conflict and violence, particularly on the work of Paul Collier and Anke Hoefler. By systematically applying the Collier-Hoefler model to 15 countries in 6 different regions of the world, the two volumes conclude that the "greed" versus "grievance" debate should be abandoned for a more complex model that considers greed and grievance as inextricably fused motives for civil war.

ATTACKING AFRICA'S POVERTY: EXPERIENCE FROM THE GROUND

Edited by Louise M. Fox and Robert B. Liebenthal

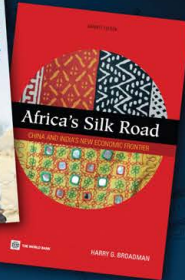

By all measures, poverty in Africa as a whole has increased and deepened. But in fact, Africa contains a number of undocumented success stories of poverty reduction. This book presents case studies of thirteen of these success stories, giving grounds for some real hope, and providing useful learning for all—policymakers, governments, businesses, service providers, NGOs, and donors.

March 2006. 416 pages. Stock no. D16322 (ISBN 0-8213-6322-0). US\$45.

New World Bank Publications on

AFRICA

Last year the World Bank developed an Africa Action Plan which seeks to strengthen the drivers of growth—through helping develop a vibrant private sector, expanding exports, investing in infrastructure, improving public sector governance, increasing agricultural production, and investing more in education, health, and other basic services. The titles featured here all seek to provide further information to policymakers, practitioners, academics, and investors interested in these topics in Africa.

AFRICA DEVELOPMENT INDICATORS 2006

Africa Development Indicators 2006 provides the most comprehensive source of African economic and social data available in one volume. It puts together data from different sources making it an essential tool for policymakers, researchers, and other people interested in Africa. This year edition was totally revamped. It includes the *World Bank Africa Database Single User CD-ROM* and an opening article from leading economists reporting and analyzing key African economic and development issues.

September 2006. 160 pages. Stock no. D16537 (ISBN 0-8213-6537-1). US\$125

AFRICA'S SILK ROAD China and India's New Economic Frontier

By Harry G. Broadman

Africa's Silk Road finds that China and India's South-South commerce with Africa is about far more than natural resources, opening the way for Africa to become a processor of commodities and a competitive supplier of goods and services to these countries—a major departure from its long-established relations with the North.

There are significant imbalances, however, in these emerging commercial relationships. These can be addressed through a series of reforms in all countries:

- "At-the-border" reforms, such as elimination of China and India's escalating tariffs on Africa's leading exports, and elimination of Africa's tariffs on certain inputs that make exports uncompetitive
- "Between-the-border" improvements in trade facilitation mechanisms to decrease transactions costs
- Reforms that leverage linkages between investment and trade, to allow African businesses to participate in global production networks that investments by Chinese and Indian firms can generate.

November 2006. 256 pages. Stock no. D16835 (ISBN 0-8213-6835-4). \$29.95

2. The Arrival
3. Caring for the Member

**Be a Road Boss!
Take good care of our AAA members and win great prizes!**

ROAD WARRIORS CHALLENGE 2014 FOR DRIVERS

From May – September 2014, you're invited to participate in the Challenge by completing required Road Warriors Challenge 2014 training.

ROAD WARRIORS CHALLENGE

ROAD WARRIOR DRIVERS CAN WIN BIG IN 2014!

DRIVERS will be awarded \$80,000 in 4 drawings!

TRAINING AND ELIGIBILITY:

1. Complete Road Warriors Driver Training
2. Five Diamond training within the last three years

AWARDS:

Drivers, you will have the chance to win in 4 drawings. The 1st drawing is a random drawing of Drivers who meet the above training and eligibility requirements. The final 3 drawings are based on your combined performance scores – Overall Satisfaction, Response Time Satisfaction and Service Vehicle Driver Satisfaction. So the better your performance, the higher your tier, and the higher your chances to win!

AAA Mid-Atlantic Road Warriors Challenge-Tier Structure – Sweep		
Tier	Performance Score	Entries in Drawing
Tier 1	255-269	1
Tier 2	270-279	2
Tier 3	280+	3

ELIGIBILITY DRAWING - On July 8th, Drivers will win a \$100 gift card in the Eligibility Drawing! Complete the Road Warriors and Five Diamond training by June 30th and you'll automatically be entered into this random drawing.

SWEEPS 1 - On August 5th, Drivers will win a \$100 gift card in the 1st Sweepstakes Drawing! This is based on your performance scores for the period of May 1 – July 31.

SWEEPS 2 - On September 2nd, Drivers will win a \$100 gift card in the 2nd Sweepstakes Drawing! This is based on your performance scores for the period of May 1 – August 31.

SWEEPS 3 - On October 7th, Drivers will win a \$100 gift card in the 3rd Sweepstakes Drawing! This is based on your performance scores for the period of May 1 – September 30.

MYSTERY SHOPPING:

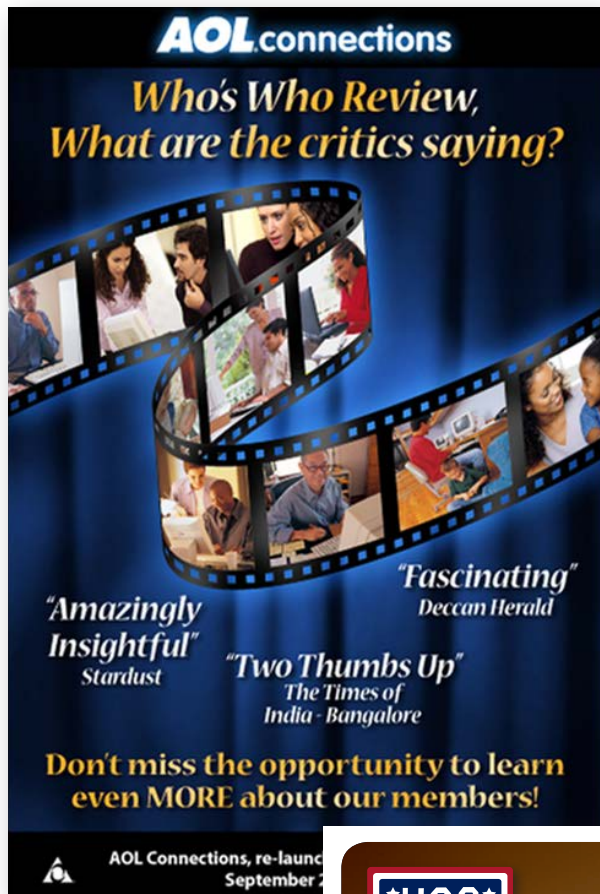

Be a Road Warrior and win up to \$100! Show you're a true Road Warrior during a mystery shop and you could win up to \$100 right on the spot.
